SUBJECT INDEX

Abrasion
the abrasive wear behaviour of austempered spheroidal cast irons, 271
effect of aging on abrasion rate in an Al–Zn–Mg–SiC composite, 1
Abrasive wear
the effect of fibre orientation on the abrasive wear behaviour of polymer composite materials, 127
Aluminium
effect of aging on abrasion rate in an Al–Zn–Mg–SiC composite, 1
unlubricated sliding wear behaviour of Ni diffusion-coated Ti–6Al–4V, 259

Bearings
analysis of a big-end bearing — a finite element approach, 117
a comparative study of flexible thrust pad hydrostatic bearings with different restrictors, 53
extending the life of aerospace dry bearings by the use of hard smooth counterfaces, 289
performance studies on Sursulf-treated plain carbon steel journal bearings under mixed lubrication conditions, 239
Blast wear
the influence of corrosion and hydrogen cracking on blast wear in wet media, 15
Boundary lubrication
thermal stability of esters under simulated boundary lubrication conditions, 211

Carbides
the erosion of carbide–metal composites, 347
Carbon
effect of sliding friction on the fatigue strength of a medium carbon steel, 197
performance studies on Sursulf-treated plain carbon steel journal bearings under mixed lubrication conditions, 239
Cast irons
the abrasive wear behaviour of austempered spheroidal cast irons, 271
Ceramics
unlubricated sliding wear of ceramic materials, 363
Coatings
erosion of hard material coating systems, 325
unlubricated sliding wear behaviour of Ni diffusion-coated Ti–6Al–4V, 259
Composites
effect of aging on abrasion rate in an Al–Zn–Mg–SiC composite, 1
the effect of fibre orientation on the abrasive wear behaviour of polymer composite materials, 127
the erosion of carbide–metal composites, 347
Contacts
analysis of the shape of the contact geometry during meshing of involute gears, 183
damage process of Permalloy during repeated frictional contact, 37
a full numerical solution for general transient elastohydrodynamic line contacts and its application, 143
microdamage in sliding contacts, 223
Corrosion
the influence of corrosion and hydrogen cracking on blast wear in wet media, 15
Cutting
study of cold welding caused by friction in metal cutting, 173

Dry bearings
extending the life of aerospace dry bearings by the use of hard smooth counterfaces, 289

Elastohydrodynamics
a full numerical solution for general transient elastohydrodynamic line contacts and its application, 143

© Elsevier Sequoia/Printed in The Netherlands

Erosion
the effect of mechanical properties on erosion, 307
the erosion of carbide–metal composites, 347
erosion of hard material coating systems, 325
Esters
thermal stability of esters under simulated boundary lubrication conditions, 211

Fatigue
effect of sliding friction on the fatigue strength of a medium carbon steel, 197
Fibres
the effect of fibre orientation on the abrasive wear behaviour of polymer composite materials, 127
Finite element methods
analysis of a big-end bearing — a finite element approach, 117
finite element simulation of the friction mechanism in plastic-working technology, 41
Friction
damage process of Permalloy during repeated frictional contact, 37
effect of adsorbed water on friction of hot-pressed silicon nitride and silicon carbide at slow speed sliding, 107
effect of sliding friction on the fatigue strength of a medium carbon steel, 197
finite element simulation of the friction mechanism in plastic-working technology, 41
study of cold welding caused by friction in metal cutting, 173

Gears
analysis of the shape of the contact geometry during meshing of involute gears, 183

Hydrogen cracking
the influence of corrosion and hydrogen cracking on blast wear in wet media, 15
Hydrostatic bearings
a comparative study of flexible thrust pad hydrostatic bearings with different restrictors, 53

Involute gears
analysis of the shape of the contact geometry during meshing of involute gears, 183

Journal bearings
performance studies on Sursulf-treated plain carbon steel journal bearings under mixed lubrication conditions, 239

Lubrication
performance studies on Sursulf-treated plain carbon steel journal bearings under mixed lubrication conditions, 239
thermal stability of esters under simulated boundary lubrication conditions, 211

Magnesium
effect of aging on abrasion rate in an Al–Zn–Mg–SiC composite, 1
Meshing
analysis of the shape of the contact geometry during meshing of involute gears, 183
Metal cutting
study of cold welding caused by friction in metal cutting, 173

Nickel
unlubricated sliding wear behaviour of Ni diffusion-coated Ti–6Al–4V, 259
Nylon 6.6
a running-in model for the reciprocating sliding of Nylon 6.6 against stainless steel, 71

Oxidative wear
a study of mild oxidational wear for conditions of low load and speed, 95

Permalloy
damage process of Permalloy during repeated frictional contact, 37
Plasticity
a general expression for plasticity index, 161
Plastic-working technology
finite element simulation of the friction mechanism in plastic-working technology, 41

Polymers
the effect of fibre orientation on the abrasive wear behaviour of polymer composite materials, 127

Silicon carbide
effect of adsorbed water on friction of hot-pressed silicon nitride and silicon carbide at slow speed sliding, 107
effect of aging on abrasion rate in an Al–Zn–Mg–SiC composite, 1
Silicon nitride
effect of adsorbed water on friction of hot-pressed silicon nitride and silicon carbide at slow speed sliding, 107
Sliding
effect of adsorbed water on friction of hot-pressed silicon nitride and silicon carbide at slow speed sliding, 107
effect of sliding friction on the fatigue strength of a medium carbon steel, 197
microdamage in sliding contacts, 223
a running-in model for the reciprocating sliding of Nylon 6.6 against stainless steel, 71
Sliding contacts
microdamage in sliding contacts, 223
Sliding friction
effect of sliding friction on the fatigue strength of a medium carbon steel, 197
Sliding wear
unlubricated sliding wear behaviour of Ni diffusion-coated Ti–6Al–4V, 259
unlubricated sliding wear of ceramic materials, 363
Stainless steels
a running-in model for the reciprocating sliding of Nylon 6.6 against stainless steel, 71
Steels
effect of sliding friction on the fatigue strength of a medium carbon steel, 197
performance studies on Sursulf-treated plain carbon steel journal bearings under mixed lubrication conditions, 239
a running-in model for the reciprocating sliding of Nylon 6.6 against stainless steel, 71
Stresses
the correlation between mechanical stresses and wear in a layered system, 27
Sursulf treatment
performance studies on Sursulf-treated plain carbon steel journal bearings under mixed lubrication conditions, 239

Thrust bearings
a comparative study of flexible thrust pad hydrostatic bearings with different restrictors, 53
Titanium
unlubricated sliding wear behaviour of Ni diffusion-coated Ti–6Al–4V, 259

Vanadium
unlubricated sliding wear behaviour of Ni diffusion-coated Ti–6Al–4V, 259

Wear
the abrasive wear behaviour of austempered spheroidal cast irons, 271
the correlation between mechanical stresses and wear in a layered system, 27
the effect of fibre orientation on the abrasive wear behaviour of polymer composite materials, 127
the influence of corrosion and hydrogen cracking on blast wear in wet media, 15
a study of mild oxidational wear for conditions of low load and speed, 95
unlubricated sliding wear behaviour of Ni diffusion-coated Ti–6Al–4V, 259
unlubricated sliding wear of ceramic materials, 363
Welding
study of cold welding caused by friction in metal cutting, 173

Zinc
effect of aging on abrasion rate in an Al–Zn–Mg–SiC composite, 1
